EDUCATION

American University of Sharjah

Bachelor of Science in Computer Science

Relevant coursework in software engineering, including requirements analysis, software design, collaborative development, documentation, and version control.

Repton School Dubai

A Levels

Relevant subjects: Computer Science, Mathematics, and Physics.

PROJECTS

Health and Nutrition Application

- Developed an application focused on improving health awareness through nutrition logging and organized progress tracking.
- Structured user-friendly flows for recording daily information and reviewing habits over time.

Padel Application with Machine Learning

- Developed a padel-focused application with a machine-learning feature designed to work with camera input.
- Explored how visual data could support performance analysis, useful feedback, and a more engaging player experience.

Additional Computer Science Projects

- Completed individual and team projects involving problem decomposition, application design, technical documentation, testing, and iterative improvement.

SKILLS

Technical: Programming fundamentals, software design, data structures

Tools: Git, GitHub, version control, collaborative repositories

Analytical: Mathematics, logical reasoning, structured problem-solving

Other: Teamwork, communication, documentation, adaptability

Spoken: English
